- Leaflet Maps
- GeoLib
- Mapquest API
- Mapbox

Work Experience

Nashville Software School

Apr 2019 - Sep 2019

Intensive full-time 6-month software development boot camp focusing on full stack (React/C#/.Net) development fundamentals and problem solving. The final half of the program executed in a simulated company environment with Scrum methodology.

- Created browser-based applications with HTML, Javascript, jQuery; styled with CSS and Bootstrap.
- GitHub used for project management, source code version control, and collaboration.
- Source code written and edited in Visual Studio Code and Visual Studio.
- Automated and bundled tasks using Grunt and Browserify, and minimized errors with ESLint.
- Used React and JSON while honing front-end skills and building a successful capstone project.
- Worked with team members to build a virtual marketplace using C#/.Net and SQL Server.
